Fixtures served by underground wiring will be available at these rates when the underground cable is buried in the same trench with the underground distribution system and the excess trench required does not exceed 50 feet per pole on the average. When the distance exceeds the base allowances listed, a contribution in aid of construction will be charged amounting to \$1.75 per foot for the footage in excess of the base allowance. Where underground wiring is desired, and paving or other obstruction exists, the member will be required to perform all trenching, install duct furnished by the Corporation, backfill and complete the paving to the mutual satisfaction of all parties concerned. When requests are received for underground wiring for lighting after the distribution facilities have been installed, a charge of \$4 per foot will be required for all trenching or \$16.50 per foot for “jet-tracking,” with a minimum charge of \$75 per pole to be installed.
