

# Stay Back!

Know the difference between types of lines and wires. If you see a downed electric line, be aware that it could be live and dangerous and call us at 770-429-2100.

**COBB EMC**

## Electric Wire

.....

Electric wires are larger and can be easily identified by the three separate twisted wires, one being uniquely silver or uninsulated.

## Cable Wire

.....

Cable lines are round and look similar to the coaxial cable that connects to the TV in your home.

## Phone Wire

Telephone wires are typically smaller, flat wires.
